GUEST PRESENTERS

Team GEM

Team GEM was born at the school gate after a chat between two mums. We discovered that two of our daughters, who were playing in the same netball team, were fighting anxiety. We knew that playing netball and being involved in a Club was assisting in this fight and we started to brainstorm what else we could do. With the help of another mum and coach at the Club we created an empowerment program, designed to give our players confidence and the ability to discover who they were off the court – which we know as EmpowerPLAY.

After the success of Team GEM's EmpowerPLAY program, they're back again with another incredible program called CommUNITY. Team GEM will give attendees a taste of the CommUNITY workshop which will provide the tools for Committees to create a stronger foundation for engagement and commitment within their community.

Darren Anderson: Forward Pivot

Darren is a sport development expert specialising in the design of community sport programs such as NetSetGO. Through his consultancy Forward Pivot, Darren empowers local associations through to governing bodies with practical ways to improve their members' experiences and increase participation. Over the past year Darren has supported Netball Australia to develop its latest One Netball programs, the NetSetGO pilot programs, and the upcoming refresh of the NetSetGO Playground.

Darren will provide practical solutions to how to improve the NetSetGO experience for participants and how this can assist to grow your Association and Club. You come away with a higher sense of purpose, value & ownership towards NSG, empowered with practical things to do 1) tomorrow and 2) next season to improve the NSG experiences they provide. What Darren will cover could apply across a wide array of Association programs too!
